Foreign Travel

The Guaranty Trust Company issues travellers' letters of credit and travellers' cheques available in all parts of the world. A special telegraphic code for the use of travellers is provided. The London Office, conveniently situated near the Bank of England, receives and forwards travellers' mail and is thoroughly equipped to transact any business of the Company.

The Guaranty Trust Company's enormous business in foreign exchange and commercial credits—nearly one thousand million dollars in 1906—has made its name thoroughly familiar in Great Britain and on the Continent and should recommend its letters of credit to intending travellers. The Guaranty Trust Company desires to increase the volume of its travellers' credits and invites correspondence upon the subject.

APRIL PRODUCTION 3,000,000 LBS. LESS THAN IN MARCH.

What Amalgamated Paid for United Conner Interests at Butto-New Discoveries of Promising Ore-Flooding Home-stake Mine Goes On Apace-Mine News.

BUTTE, Mon., May 1.—The copper produc-tion of the Butte mines in April was 27,673,200 pounds. The mines of the Boston and Mon-tana Company were closed for a little while on account of labor troubles, and the thirty days of April against the thirty-one days of March showed a decrease in the copper pro duction of nearly 3,000,000 pounds.

The daily average output of ore by all the mines was 13.055 tons and the daily average copper production was 347,440 pounds.

In the recent investigation of United Cop-

per affairs through court proceedings in New Jersey, persons formerly identified with Amalgamated and Coalition testified that the total price paid United Copper for its Butte interests was \$10,590,000, but Heinze interests declare the price was in-excess of that figure. United Copper officials have declined to give a list of the company's present holdings, on the theory that such publicity would defeat negotiations for the acquisition of chery property and interests. property and interests. It has generally been understood that United Copper owns the La France Company which is operating the Le cington mines in Butte, and that the Heinzo, interest in the Davis-Daly Company is an asset of the United Company is a company is a company in the United Company in the United Company is a company in the United Comp Copper owns properties in Montana, Idaho, Washington, Utah, Arizona and Mexico, and pro bably some in British Columbia. F. A. Heinze, since the sale of his Butte properties to the Butte Coalizion, has been very setive in the search for new properties for the United Copper, and his friends say he has been very successful.

Mr. Heinze says the assets of the United Copper Company are greater to-day than they have been at any time since the organization of the corpany and that the property of the Montava Ore Purchasing Company is four or five times greater than it was before the sale to the Butte Coalition.

It is armounced that the intention of the directors, of the Snowstorm Mining Com-

It is afmounced that the intention of the directors, of the Snowstorm Mining Company is to disburse 45 cents in dividends a share in the remaining eight months of the year. Five cents a share is to be paid in May and an equal sum in June and July and six cents a share in each of the remaining months, a total of \$675,000. The Snowstorm is in a splendid physical and financial condition.

The Montana-Illinois Copper Mining Company has been incorporated with a capital stock of 2,000,000 shares, par value \$1. The company has taken over the property of the Flamark Copper Company, which has been eveloping mines at Mammoth, Madjeen county. The Bismark Company became embersished the work. The property consists of eleven quartz claims, two placers, a mill site, water rights and 320 acres of timber land. Considerable work has aiready been done on the claims, consisting principally of an adit \$25 feet long, which the new company will extend to a distance of at least 1,500 feet. The workings have been taken.

The Calumet & Butte Development Company has been reorganized as the Calumet & Butte Mining Company, and has added a lot of claims to its original holdings on the east side of the Butte district. The company has 150,000 shares of capital stock, \$10 par It controls about 160 acres of ground and has developed one claim with a shaft new 500 feet deep, and upon which it is now werking.

soo feet deep, and upon which it is downed ing.

A four foot vein of 7 per cent, copper ore has been cut in the shaft of the Amazon-Butte Company, one of the new companies operating in the east side section of the district. A portion of the vein is sulphide and carries a lot of high grade ore. The shaft is 360 feet deep. A station will be cut at the 400 foot point, and some crosscutting will be done. The Amazon-Butte lies some distance south of the Bullwhacker, from which tributers are shipping 100 tons of ore daily. The Bullwhacker, however, is a north and south south on and the ore is regarded by some

done. The Amazon-butte hes some characters south of the Bullwhacker, from which tributers are shipping 100 tons of ore daily. The Bullwhacker, however, is a north and south fault vein, and the ore is regarded by some mining menas a "blowout," while the Amazon-Butte is on east and west veins, the characteristics of which are identical with the big permanent veins of the main portion of the Butte district.

Twenty inches of copper glance and three feet of ore carrying from 7 to 10 per cent, copper has been encountered in the Alax Scott mine by the Butte-Montana Company. It was found in a raise on the 600 foot level, about 135 feet east of the shaft. The Alax Scott shaft, three compartments, has been completed to a depth of 800 feet, where a station is being cut. When completed shaking will be resumed and the shaft taken to a depth of at least 1,200 feet.

The shaft of the Ophir mine has been entarged to within about 50 feet of the surface by the Butte Central and Boston Copper Corporation. The work has been dimoult during the last 100 feet, owing to the condition of the old shaft, former operators having mined and stoped ore all the way down from the surface for a distance of about 100 feet. It is expected that the shaft will be completed and that sinking from the 500 foet level will be in progress by June 1. Vary little ore is being hoisted, because it would interfere with the shaft work, and the ore being mined by tributers is being stored in the workings, to be hoisted and shipped when the shaft is completed.

A strike of cipher ore in the Receiver mine in the Continental district, three miles east of the city of Rutte, is, according to asays, the richest ever made in Montana. What are said to be average samples from the vein asay nearly 26 per cent. copper and two ounces of sliver to the ton. Mining men and Government geological surveyors have long regarded the Continental section with great housand acres of claims surrounding the new strike.

Helena, Mont., May 2.—James Walsh, State mine inspector, who has j

regarded the Continental section with great favor. Butte Continental and Correy copper companies own several thousand agres of claims surrounding the several correy companies own several thousand agres of claims surrounding the new strike.

Helena, Mont... May 2.—James Walsh, State mine-inspector, who has just returned to Helena, after completing a close examination of the fleels, speaks favorably of the outlook. He found all the properties in good physical condition, with the possible excession of an almosphera a trifle too warm because of depth. This was rapidly being regulated by ventilation. He also expet the ore was constantly improving.

A big mining deal has just been consummated in Helena. Representatives of the Little Rockies Exploration Company, for a consideration not made public but understood to run very high, secured control of the properties of the Alder Gulch company in the Zortman district, consisting of twenty-one claims and a 86,600 mill. The properties adjoin those of the Philips-Whitcomb syndicate, whose mines have been producing rich returns in recent months, and have made Chouteau county one of the leading gold producers of the State. The Exploration company has encountered the same well in development prior to purchase that exists in the Philips-Whitcomb property, and has been 180 feet in ore. The vein is said to be upward of 200 feet wide. Its values range from \$5 to \$1,800 a ton, averaging about \$16. The new owners purpose increasing the present output of their mill, 600 tons a day. This same company has also secured control of a group of twelve claims on Little Creek, near Helena, from Hudson & Duncan, where development work has shown the existence of ore carrying values in gold, copper and aliver. A mill will be built at the property for concentration.

Smith, Horsky, Lockey and Olds of Helena have secured a \$50,000 bond on the Daniels-Goedes group of claims near Winston, and purpose development work has shown the existence of ore carrying values in gold, copper and eliver. The Prope
